

ELISA VASP - Bibliography

- "A Phase 1 Study of Prasugrel in Patients with Sickle Cell Disease: Pharmacokinetics and Effects on ex Vivo Platelet Reactivity. Jakubowski et al Br J Clin Pharmacol. 2013, 75(6): 1433-44
- "Comparison of a new ELISA assay with the flow cytometric assay for platelet vasodilator-associated stimulated phosphoprotein (VASP) phosphorylation in whole blood to assess P2Y12 inhibition" Jakubowski et al. Thromb. Haemost 2012;107, 388-395.
- "Differential Effects of Omeprazole and Pantoprazole on the Pharmacodynamics and Pharmacokinetics of Clopidogrel in Healthy Subjects: Randomized, Placebo-Controlled, Crossover Comparison Studies" Angiolillo et al. Clin Pharmacol Ther. 2011;89(1):65-74
- "Validation of a novel ELISA-based VAsodilator Stimulated Phosphoprotein whole blood assay to measure P2Y12-ADP receptor activity" Barragan et al, Thrombosis and Haemostasis 2010; 104(2), 410-411.

- Abstract ISTH 2009 #PP-MO-787; Comparison of a novel ELISA-based VASP whole blood (WB) assay with the flow cytometric (FC) technique
J. A. Jakubowski, D. Boulay-Moine, N. Bourguet, A. Sugidachi, P. Barragan, M. Moulard
- Abstract EBR 2010 #P5354. Validation of a novel ELISA-based VASP whole blood assay to measure P2Y12-ADP receptor activity. Bonello et al
- Abstract EBR2010. VASP ELISA-based whole blood assay: A new tool to monitor P2Y12-ADP receptor activity. N Bourguet; P Barragan; F Paganelli; L Bonello. M Moulard
- Posters : ISTH 2009, EBR2010
